

# Calerb Louis Jean

## Software Developer

I have been working in web development since 2019, the period during which I have worked in different environments, from small projects to start-ups. I am a self-motivated and self-taught professional who likes to solve problems. I merge a passion for usability and user experience with technical knowledge to create user friendly digital experiences. My repertoire includes programming languages and tools such as ReactJS, Wordpress, CSS, Bootstrap, jQuery, and more NodeJs and PostgreSQL.
